

**SUMMARY OF POINTS REGARDING
PROJECT STARLIGHT
FOR THE CLINTON ADMINISTRATION**

PROJECT STARLIGHT is a program spearheaded by CSETI (The Center for the Study of Extraterrestrial Intelligence) to educate world leadership and the world's population regarding the reality of UFOs/ETI. Key points include:

- It is our sincere intention to cooperate with the U.S. government, the United Nations, and other governments, and to conduct the briefing process and the Announcement so that neither the Administration nor the government in general is harmed. We invite active U.S. government participation in this process and feel that for a number of reasons it is in the best interests of the Administration to do so.
- Project Starlight has commitments of assets, both evidential and in the form of key first-hand, credible witnesses to make an undeniable case for the extraterrestrial origin of these objects. These assets include day and nighttime videotape footage, photographs, radar tapes, pilot cases, landing trace cases, and the important testimony of former government and military officials from the U.S., Europe, and Russia who have knowledge of this subject, in several instances including knowledge of spacecraft wreckage and extraterrestrial bodies. These witnesses are willing to testify publicly before major media.
- Project Starlight has access to and offers of cooperations from major media, both print and electronic. These are respected mainstream media sources, not "tabloid" type.
- We are working with other leaders in society, here and abroad, who concur that now is the time to change current government policy to one of increasing openness and disclosure of evidence on this subject.
- The ending of the Cold War and the beginning of a new Administration provides a unique "window of opportunity" for such a change in policy and for the cooperative disclosure of evidence (See position paper "Strategies and Rationale for Changing Government Policy".)

- To reduce the potential for a panic reaction in society, the Announcement should be spearheaded by civilian researchers and scientists. A government announcement alone may appear abrupt and alarming.
- Failure to effect a change in policy and to provide disclosure on this subject by the Administration may result in regrettable outcomes for the Administration because:

1. The window of opportunity will have been lost, insofar as the end of the Cold War would be a relatively distant event and the new President and his appointed officials would have lost the protective aspect of being new to their responsibilities.

2. Given the current increasing trend in extraterrestrial activity and increasingly successful CSETI attempts to establish contact with these spacecraft (See CSETI Briefing Document), there is a very high probability that a major UFO event of a publicly undeniable nature will transpire before the current President's term expires in January, 1997. A controlled and well thought out Announcement and disclosure of evidence is much preferred over an uncontrolled and surprising event. While the former, if handled wisely, could have a unifying and beneficial effect on humanity, the latter would very likely have a negative and very destabilizing effect. Therefore, the highest risks are associated with non-disclosure.

3. By 1995, re-election concerns and other factors would make this process of disclosure increasingly risky due to the competitive and divisive nature of political campaigns.

4. Other governments are moving in the direction of disclosure on this subject, and the Japanese government is funding and has plans to open a major museum on UFOs/ETI in 1996, before the current President's term expires.

5. Other civilian UFO groups who have a decidedly confrontative approach to the U.S. government are building a base of both congressional and grass roots support which may prove embarrassing to the government and military in the U.S. In contrast, Project Starlight is committed to working cooperatively with the U.S. government and avoiding language or evidence which would be harmful or embarrassing.

6. There are other civilian groups which are framing this topic in alarmist, xenophobic and potentially conflict-oriented ways which will prove harmful to world stability and to the world's "consciousness." This potentially harmful trend would be contained by Project Starlight, which is committed to presenting this information in a scientific, non-alarming and hopeful manner.

- We have learned that the other nations of the world are looking to the U.S. for leadership on this subject. Providing that leadership on a subject this important would strengthen the Administration's stature in the Post-Cold War era.
- Insofar as a majority of Americans hold that UFOs are real and are probably interplanetary spacecraft, the President would be viewed in a positive, courageous and possibly even heroic light for cooperating with such an Announcement and briefing process. Similarly, the public would become convinced that a new era had truly begun where government could be trusted to tell the truth; such a perception could go a long way towards erasing the cynicism and mistrust which has developed since the assassination of Kennedy, the Vietnam War, Watergate and other scandals. It would certainly be convincing evidence that the Administration is sincere about building a "new covenant" with the people and would fulfill the promise of a new openness in government. Mr. Woolsey's comment on "Larry King Live" on November 30, 1993, that the Administration wished to "disclose historical material" in a spirit of new openness would be fulfilled by a cooperative relationship with Project Starlight.
- We are sincerely dedicated to fulfilling this project in a way which would be a positive event for humanity. We are acutely aware of the profound implications this project might have, both positive and negative, on humankind, in general, and on economic and other systems, in particular, and are therefore making all efforts to prevent a negative or alarmist tone from creeping into the message. U.S. government cooperation in this project would assist us in this goal, and specifically could serve to calm the financial markets in the period of the Announcement.
- A major media project, plus a major east coast U.S. newspaper will probably be completing large scale investigative reports on this subject in the next 12 months. These projects, which are very high quality and

credible, will be seen by millions and probably hundreds of millions of people. Along with Project Starlight, which will conduct briefings and an Announcement with or without government cooperation, this subject, and the U.S. government's connection to it, will be known by a very large segment of the population. The Administration would be best served by positioning itself in a cooperative, open, disclosing manner during this process. To do otherwise would be to increase suspicion and mistrust of government in general and the Administration in particular.

- Government cooperation and involvement with Project Starlight would afford government valuable input into the process, content and timing of these events. A passive or non-cooperative stance would of course have the opposite effect.
- In any case we do not desire, nor do we recommend, the disclosure of certain valid secret projects which are vital to national security or to future defense readiness, including projects at Nellis Air Force Base in area S4, which apparently deal with reverse engineering extraterrestrial technology for human applications.

Irrespective of the level of U.S. government involvement or cooperation, we wish to assure you that we intend to conduct this project in a way which will not harm the President, the military, the Government or the society in general. However, due to the high likelihood of extraterrestrial-human interactions in general, and extraterrestrial contact by CSETI research teams specifically, which may be imminent, we are committed to fulfilling this project within the coming year. Furthermore, we are carefully and systematically thinking through what needs to be included in an extended effort that will assure that the response to this Announcement is positive and full of hope. We welcome and invite your participation.
