The Sunday Times: Innovation:

UFO group wants Congress to examine 'proof' of aliens

AN American UFO research group says it will go public with its evidence of aliens if a congressional hearing is not held into the existence of extraterrestrial spacecraft, writes Sean Hargrave.>

The Centre for the Study of Extra Terrestrial Intelligence (CSETI) claims to have 50 witnesses of UFOs who have, or have had, high-level security clearance positions in America's armed forces, intelligence services and military contractors.

The hearing would be needed because it would protect witnesses who would be breaking national-security oaths if they gave evidence elsewhere. Also, a congressional hearing could subpoena additional witnesses who could be imprisoned if they lied under oath.

Steven Greer, a casualty doctor who is the leader of CSETI, arranged a briefing this month at which he claimed representatives from 30 congressmen's offices were present, including several congressmen.

Greer says 11 people told the briefing of their encounters with UFOs. He hopes that those who attended will take CSETI's claims more seriously and back his call for a full hearing."

"We're not asking anybody suddenly to believe in UFOs, because nine out of every 10 times, what you hear is absolute rubbish," says Greer. "We just want them to see there is sufficient evidence to warrant a hearing where we can present our case. That is all we are asking. We hope at least one of them is brave enough to back us."

Greer claims to have photographic, video and documentary evidence that shows the military has tracked and even recovered UFO craft, as well as their occupants.

Greer's campaign has the backing of Edgar Mitchell, a former astronaut who in 1971 became the sixth man to walk on the moon.

"The body of evidence is just so overwhelming," says Mitchell. "The
