

[REDACTED]

Unknown interviewer: All right, [REDACTED] what is your full name and where do you live? What do you do? What is your military record all about?

[REDACTED]: Okay. My name is [REDACTED], and I live in Victorville, California. And as far as that, I'm the chairman of the board of [REDACTED] International, a Delaware corporation and [REDACTED] Realty Group. [REDACTED] Capital Group. I am also affiliated with the [REDACTED] and I'm a real estate developer and also marketing real estate. My previous history with the air Force was from 1962 to 1977. I was an enlisted aircrew member, both as a flight steward and loadmaster. My serial number at that time was AF [REDACTED]. Surprisingly, I can still remember that after all these years. And where would you like to go from there?

Unknown interviewer: Your service experience and how did that connect you to the UFO phenomenon?

[REDACTED]: I would have to take us back to 1963 while I was stationed in Germany. I was with the [REDACTED] Group, and we were a VIP flight group that flew General ?, and General Alexander and General Ford around throughout Europe and any other VIP flights. I had the pleasure of flying in June of 1963 with President Kennedy on his European tour. And while I was on that trip, I shared with him a local newspaper in Germany where they had just sighted a UFO and also had some other sightings in other parts of Germany. And this led into some conversation between us. And he asked me and he said well young man, what do you think about it? And I said, I think it's terrific. I think it's exciting.

And for us to think that there is no other you know, no other beings and no other power, Yeah, I think would be ludicrous. And I in turn and says, well, what do you think about it? And everything, and he says, well, I would have to agree with you. And, and just kind of left it at that. I left Europe. I should back up a minute as far as that. One of my trips was with a gentleman that was a flight officer and a pilot with the Canadian Air Force down in? And this was probably in 1964. And he told me of some encounters that they had had some sightings and that they chased him with the F-104s, and that they could not keep up with him and could not maneuver the way the craft did.

And I had heard some stories as far as regards to Air Force pilots and others that had seen similar, but they were basically told, you haven't seen it, you don't know where it is. And if you continue to talk about things like this, we'll see if we can't find another job for you. I was transferred from Germany to Colorado Springs to the Air Defense Command headquarters at Peterson Field to the flight division and I had been there not quite a year. And I was called on.

I was transferred from Wiesbaden Air Force base, Germany, to Colorado Springs, Colorado, to Peterson Air Force Base, which is the flight division for Air Defense Command. And during my tenure there from 1965 to 1967, I had two experiences that were, I would have to say were extra ordinary. I was transferred from Wiesbaden Air Force Base, Germany, to Peterson Air Force Base, Colorado Springs, Colorado, which was the Air Defense Command flight and flight headquarters. And during my tenure there from 1965 to 1967, I had two experiences that kind of awakened me to the true extraterrestrial flight and sightings phenomenon. My first experience was where we were briefed ahead of time, and they had selected me because of my security clearance. I had to top hat, which was from my presidential clearance times.

I was transferred from Wiesbaden Air Force Base, Germany, in 1965, the summer of 65, to Peterson Field, Colorado Springs, Colorado, which was the Air Defense Command flight headquarters. During my tenure of duty there from 1965 to 1967, I had two special missions that allowed me the opportunity to become, I would say, informed as to the extraterrestrial and UFO phenomenon. The first one we had a special briefing on at our command, and it was a minimum crew, we were told as far as that, what you see, you forget, you don't know. It never happened. And we were required to sign a 20-year non-disclosure statement with full penalties. From there, we began the mission. We flew back to Washington, DC, to Andrews Air Force Base. We picked up a contingency of both military and civilians and went to Wright-Patterson Air Force Base in Dayton, Ohio. We picked up a brigadier general and some civilians and other staff and then flew from there to Alamogordo, New Mexico, down to the White Sands area. We were offloaded, we were all kept together and we were told no recording devices, no cameras. And we were put on a bus and we rode somewhere between 45 minutes to an hour out off of the base into a desolate area and as far as into a box canyon. One of the things that surprised me was the fact that the security, number one was not in any type of uniforms that I had seen before.

It was not it was not an army, you know, security force or Air force security. But they had kind of a blue green uniform. They were armed and it was a security checkpoint. We rode in and rode in through the box canyon, and then it opened up. Once we had cleared the security checkpoint, we drove on into the box canyon, and it opened up into just a large area. It had runway, some Quonset aircraft hangars and some buildings in the background. You had kind of a treat area up on the hillside and in some trees around the buildings. The two enlisted, myself and the flight engineer, were required to stay with the bus and the driver, the rest of the entourage went on across to the flight line and which was about 100 yards away from us. What was most interesting about this was the fact that there was a UFO an ET vehicle that was on the on the ramp.

There were two individuals that the way I would have to describe them that knowing that the general was somewhere around 5'10" to 6 foot tall, that these people were equally about as tall as he was. They were an ashen gray. The uniforms that they wore were all one piece and kind of a metallic light silver. Silver. Silver. Gray colored. I did not see any distinguishing marks, so I did not see any hair. As far as the. The hands were basically, from what I could see, five fingered but longer thinner and the neck was longer. And the head was as far as kind of elliptical is the way I would describe it. And the eyes were not pure oval but kind of like so. And the mouth line was almost straight across. I could not tell as to whether there was actually any conversation going on between the parties, but we could see that the whole entourage was around them.

They went around the space vehicle and it was elliptical shaped and was standing on basically like three pods. When we this when we got back together again, it was I would have to say about mid-afternoon we were there for all of about, I'm going to say about 4 hours. I would say that the excitement level was definitely there. The I had been asked as far as if there were any conversations going on between the between the members of the party that we had brought there. Basically, there was nothing discussed on the ride back nor on the air on the flight back. And I would have to say that my curiosity was definitely up. But protocol required me not to ask questions and it would have been quite improper of me to do so. The next experience occurred, I'm going to have to say the following year, and we had the same type of a briefing, same type of situation. The next experience was the following year we had a similar briefing, similar non-disclosure statement, and we flew back to Washington and this time we were using a C-118, one of our four engine aircraft, flew back to Andrews Air Force Base, picked up the contingency, flew back into Wright-Patterson Air Force Base, picked up a general officer and staff, and we flew to Los Angeles, picked up some people there out of Air Force space systems there, and then on out to Hawaii.

We arrived in Hawaii somewhere around midday and we were told that we would get back together and departing at midnight. So, we prepared and when we left at midnight, we flew for about 3 hours and 35 minutes and landed. And I told the engineer, I says, we're back in Hawaii, says. I says nah. Excuse me. I said, We're back in Hawaii. I said, there's nowhere we can fly this airplane for three and a half hours and land other than Hawaii. Johnson Island was too far away. Guam was definitely too far away. And so, you know, I said, we're back in Hawaii somewhere. So anyway, we got off the off the plane. We were all gathered together. We were put on a bus. We went over to a staging area that we could hear the waves and all like that. And about 6 a.m., we were all gathered together on an observation deck, which was basically concrete and block wall looking to the west. The sun was coming up from behind us, so I knew that we were looking to the west side of the island and we had been there maybe a half an hour and all of a sudden right out of the water came this vessel that went up like this. And bam, just like this, hovering up out of the water about 100 feet off the water.

And it was elliptical shaped and it had a band of light that was that was oscillating on it. And there was no sound, nothing. You could not hear anything as far as coming from this vehicle, as far as how it you know, how it propelled itself, whatever, stayed there for a few moments and then it just instantaneously vanished. And then it came back and then it basically moved up, down, cross back and then back in front of us and then just back this way and back into the water. What was interesting about this was that was the fact that both coming out of the water and going back into the water, it's not like throwing a rock into the water or anything like this. It was like just cutting right through like a knife, through butter. It was just very smooth transition into the water. Needless to say, there was a considerable amount of excitement and you could hear the you know, everyone was talking about it and observations. When we got back on the airplane and our return trip, nothing in my presence was discussed is who it was, what they were doing, where this where this vehicle had come from and nor what its purpose was.

Those were basically my two experiences in my as far as in this period of time, I did not have any other type of encounters to where I physically saw vehicles or saw ETs. But I had a personal experience that occurred in 1970/1971 and I was stationed down Patrick Air Force Base, Florida, and one evening I was out fishing on the Banana River and I kind of like qualify something here as something so that you don't think that me and a bottle of wine or whatever. And I succumbed to a very nice hallucination. I do not drink. I do not smoke. I've never done drugs in my life. And I haven't just inhaled. It was a full moon. And as far as that, I've been fishing and I just kind of laid back and relaxed. And I would have to say that somewhere between 4 to 6 hours, I could not account for. But what I could account for was an experience that basically I was taking up into an extraterrestrial vehicle.

And the way I would have to describe this was that I was lying on a platform horizontally and with my head at this in my feet at this end. And there were three individuals to my left, I would have to describe them as one taller. And the two just about a head shoulder length shorter, that they were the same ashen gray color, basically the same shape as far as the eyes, the lip and two small holes as far as that would be to me, the breathing apparatus. There was light in the room, but I saw no light fixtures. There was opposite my feet and up on the wall was an emblem that was just the most beautiful blue I had ever seen. And within the plane of that emblem, there were three gold stars that were set up like so. And I never felt threatened. I never felt that I had to worry about my life. I was extremely comfortable and I felt as if I was being conversed with. But I did not hear anything, as if they were they were taking information from me and that I was contribute willingly.

And I would have to say that I had no ill feelings. I had nothing at all that would that would or has affected me to date that I am aware of. I did not share this experience with anyone. And I can imagine if you ask why, why not? I did not share it with anyone until later in years and I have done so openly now, especially with the release of more information and then finding out that after doing some research that we're finding out that there is a large cover up, there is absolute denial on an international basis, and yet there's too many incidences that we're not that we're not disclosing to everyone that in fact, the extraterrestrials do exist and that there are UFOs. And then as far as that, there are vehicles that have the capability of movement without sound and tremendous speeds and things like this. So, yes, I am excited and I am looking forward to being involved in a full disclosure of these matters.

Unknown interviewer: Have you ever discussed with other colleagues and military colleagues the nature of this information? Has anyone confided in you similar experiences while in the service?

██████████: Not while I was in the service. Okay. Other than the fact the information that I shared with you occurred in Germany and this was where I was dating a Canadian pilot's daughter down in X. And he had shared with me the facts of chases that they had had and in turn, some other like when Ramstein, where we were told about some fighters up there that had had chased vehicles, they could not identify those kinds of things. But as far as personal, personal sharing and experiences, no, I have not.

Unknown interviewer: Do you feel like you want to include any of the substance of the conversation with President Kennedy in this videotape at all?

██████████: Other than the fact that I feel that what I would like to do is to maintain what is relative to our subject, which is regarding the extraterrestrials and the fact that, uh, he had asked me a direct question as to what I felt about it. And I feel that his response back to me was he was aware it was stated in such a fact that it was positive and that, uh, that's all I can say about it.

Unknown interviewer: Do you think that your conversations with the President had anything to do with your inclusion in two operations that obviously had similar overtones and objectives?

██████████: That would be interesting, but unfortunately, President Kennedy died in 63 and these two instances were in 65 through 67. So, it was after his time. I think that was the reason that I was included, was the fact that I was the only enlisted flight steward loadmaster that had a top hat clearance on it, which was presidential access, and that that security clearance allowed me to be with kind of dignitaries that I was with at that time. And the nature of the material.

Unknown interviewer: I think it's important to allow viewers to understand that you've served with several presidents, beginning with President Kennedy.

██████████: I served with President Kennedy, President Johnson. I flew with Hubert Humphrey as far as into Europe in 1967. A number of dignitaries that have been Princess Radziwill, Robert Kennedy, the Ford family. I've had a number of dignitaries, officer star officer dignitaries that we have flown that were both national and international. I served with General ██████████ as his steward for two years in Europe. I served with General ██████████ in Central South America, stationed out of Panama. I had flown with a number of star officers and with General ██████████ down out of Patrick. I have been called in many times as far as working with the international dignitaries that were at the presidential level, kings and queens and various dignitaries.

Unknown interviewer: If you were to characterize the nature of the UFO experience to the American public and to the world, how would you describe it? Is it beneficial? Is it scary? Is it something that people should look forward to in their lives personally?

██████████: Oh, all I can say is it was the most phenomenal experience I ever had. Personally, I think it should be done on a universal basis. I think it should be absolutely open. In my belief there is one God and that we are all created by him and that as far as that is not just here, there's too much proof. I've seen it with my own eyes. And yes, I think everyone should know about it. And if you if you went out there today and I think as the average American off the street, do you believe that there are UFOs and that there are and I'll use the vernacular aliens, extraterrestrials. I would have to say that better than 60% would say, yes, I believe there are. And I think it would I think we should have open disclosure.
