Re: False Indications and Warnings Alert

File
PI-40
False ET + W

On an unrelated matter, I wanted you to know of something of such gravity, severity and potentially devastating consequences for the earth, that it is eclipsed by no other threat that I know of.

I have had intimations from various witnesses that, in military parlance, PI-40 had the capability and potential motive to launch 'false indications and warnings' which would simulate a false ET attack on the earth. More than one witness has mentioned this, but recently I spoke with one who had detailed information about this and confirmed it.

There are plans in place, and the capability fully exists, for PI-40 to launch an attack on the earth, which for all the world would look like a hostile ET attack. These plans are specific and there are dedicated personnel gaming this scenario. This witness, at a meeting involving NRO, NSA, CIA and Air Force covert USAPS people, heard detailed plans and confirmed that "there were two guys at the end of the table whose job it was to plan and eventually execute this hoax." God help us.

Mysteriously, thru the agency of Providence, an emergency doctor in n. CA called me today, and said that after hearing me on Art Bell, was so moved that he wanted to do all he can to help us. He shared an extraordinary ET encounter which occurred on Sept. 2 in his bedroom where ETs came to him, activated his brain with high energy, and proceeded to show him a number of 'scenes'. One was an image of the lovely planet earth, who I love so much, a darkened and lifeless cinder floating thru space. He was told that this could happen, but we could change it, if we acted. I know...

There are VERY dangerous things going on; we are on the brink of open conflict with the ETs. And the ETs may not remain restrained indefinitely. The arrogant covert rulers in PI-40 are likely to have facilities on outer planets, and could go so far as engaging a literal scorched earth policy.

EXTRAORDINARY MEASURES must be taken soon to avert this.

Not only must we be diplomatic links to the ETs, but it is clear we must also be links to the deepest levels of PI-40, and to the non-covert world - truly trilateral!

I am going to be writing this week an "Open Letter to PI-40", which will be sent to points of contact there. In it, I will offer to go in the tank with them and do what is necessary to try to fix it. If they ignore this, I will make it very clear that these schemes will be described in detail thru the disclosure process and by all means possible, and thru every agency at our disposal. If there is cooperation, and an honest disclosure can be made without the launch of these false I and Ws, then I will rationalize the secrecy as the exigencies of the cold war, etc. If not, these plans will be exposed. Under any condition, I am keeping in reserve the information and sources at the ready in case there is betrayal.

This will be dangerous.

But without an effort to provide insight , guidance and a real strategy to negotiate a peaceful conclusion to these escalating tensions, we are in for a worst -very worst- case scenario. I have been having lucid dreams about this part of things for over 20 years, and they have intensified recently, with more detail. The earth will incinerate unless there is intervention. God help us.

We must negotiate peace between the ETs and these covert rulers, drunk on arrogance; between the general public and legal rulers and the ETs; and between the covert rulers and the whole of humanity. Another triangle....

Another witness last week , a new, VERY significant one, confirmed that he had to get out of that operation because he was horrified at the unbelievable arrogance , power and unethical nature of this group. He left and is alive only because, as I also told them, he is not afraid of death, so they better leave him alone. In fact the reason he called me was because he heard me say on Art Bell that I told some of these PI-40 guys that I had died once, and was not afraid of death, and that they could not scare me that way. And he knew by that that I was real.

But now I am horrified. I have not slept well in a week because of what I now know is unfolding before us. Not that I am afraid for myself, but I fear for the earth, and her children , and my children.

Things are infinitely worse, and more evil , than anyone can imagine. How will we prevail? But we must.

I hope you do not think I have altogether gone around the bend. This is very real - very. And I must focus and intensify my efforts to pull together the parties to all of this and try to find some resolution. I believe we can make it thru this, but it will take a promethean effort to do it. And I am getting so tired.

Anyway, we must either go on, or stop. I have to fight the urge to just ride out the next few months and years out on a farm and ranch, and enjoy what is left of my childrens' childhood and life. God help us.

Steven
