IMPLANT COMMUNICATION

Since the implants in my body seem to be "locked on" to the electrical system and are pulsing electrical currents, the thought occurred to me that a manipulation of body meridial energy flows might be taking place. If the communication is along those lines, then it is only logical to try and reverse the process for the purpose of message transfer back to the intelligence behind the phenomenon. I have therefore decided to purchase a Chinese acupuncture machine (electrical), so that I may insert a needle into the implant area and pulse a current of varying frequency and intensity of my own choosing. I will first see if I can begin an implant response by external electro-stimulation. Then I will see if I can establish some form of bio-energetic alphabet or symbol coding system. I will record all experimentation and responses as I progress in time. It is quite obvious to me that the "intelligence" wishes me to be fully consciously aware of the pulsations and the fact that they are activated by either an internal source or external mechanism (depending on which implant, the location on the body and correlative information: ie - my own internal body health and nerves or other people's energy systems). As I said before, one particular type of pulsation indicates to me the presence of UFO'S, which I call an "alternating pulse" - in this case I assume that the external switch is being activated by a biological entity inside the craft. It is this type of pulse that I wish to focus my attention upon and reverse. Because I am unable to afford expensive scanning analysis for confirmation and proof, and have already tried X-rays and ultrasound, it would seem sensible to attempt a different form of evidence gathering. A predictable pattern of pulsed communications which are demonstratable to laboratory scientists would be an initial goal. So far as of the above date, information via the implants is being portioned out to me without any input on my part except to react and respond by free will choice to the directives and indicators. Perhaps this is some sort of experiment or test. Maybe there is an initiation period before metamorphosis. Possibly I am being led like a fish to a worm to a destiny I cannot see for the moment. Conceivably, I am just a very small player in a cosmic plan of human evolutionary development. WE SHALL SEE.

ULTRASOUND SCANNING RESULTS / NOV.29TH/91 : NEGATIVE SURFACE TISSUE FIND.

RECORDS : PTUI51476 / VIDEO TAPED. AREAS SCANNED : LEFT, RIGHT THIGHS & LOWER LEFT BACK.

1.15 P.M. - 16 HZ. - GAIN = 1 DB, PRW = 0DB / 50DB 1/2/0 - DEPT.40 /SPH.

\$143.00 CASH, NOT COVERED BY MEDICAL PLAN. X - RAY ALSO PROVED NEGATIVE. MORE SOPHISTICATED MRI OR CAT SCAN WOULD BE COST PROHIBITIVE. NOT AN EASY THING TO PROVE. I AM GOING TO HAVE TO RELY ON MY NEWLY DEVELOPING SENSING & HEALING ABILITIES AS DEMONSTRATIVE PROOF UNTIL SUCH TIME AS I CAN OBTAIN VERIFIABLE SCIENTIFIC OR MEDICAL EVIDENCE.
