RE: info

*File
Abductees/
Implants!*

[REDACTED]

thank you for your important email concerning the
disinformation issue ([REDACTED]s,...).
I will send you also copies from the british based
conspiracy magazine LOBSTER, where the same persons
are involved in dead treats against Martin Cannon
and british researcher Armen Victorian!
I don't know if you know that Martin Cannon, who
made excelent research in mind control changed
his meaning during one week (a few weeks after the treats)
and claims now that mind control is a myth!!!!

I know Email communications from him where he
claims that he had never said that he believes
that ''all'' alien abductions are staged by the
blackops people and that there could be an
unknown phenomenon too (real abduction experiences),
he said Budd Hopkins wrote against him and claims
that he said that he thinks that all abductions
are done by the blackops people...After that the UFO
community was completelly against him and now
he looks brainwashed!!

=====

Please keep this confidential: I believe that it
could be possible that people like J. Alexander,
A. Stubbelbine (ex. INSCOM during Iran Contra),...
(both are married or good friends
of alien abduction researchers) are involved in
such projects.

It is also interesting that [REDACTED] is a
head of the non-lethal weapons projects, like
EMP-weapons, which could be used against UFOs
[REDACTED] case), is a friend of Dr. Teller,...

He could not only be involved in mind control projects,
or virtual reality chip and secret weapon-testings.
He could also be
a man who has the resorces for real alien abductee-monitoring,
kidnapping, implant search, alien tissue search-projects...

I have victims in my files who were used for remote viewing
experiments via drugs, isolation tanks,....., after this
kidnappings and experiments they thouth that aliens were
responsible for this, in reality they were experiemnt-victims

and used for drug-psi-behaviour modification experiments! Is here a governmental PSI-research (remote viewing) connection (PSITECH) too?

=====

Since I am working as a atmospheric scientist on the Mars Global S. Mission and wrote many scientific papers concerning atmospheric evolution on Mars, Titan,...I published a paper concerning the Cydonian Hypothesis in a new Journal of Scientific Exploration, where I showed indirectly that [REDACTED] (PSITECH) and his Remote Viewers are wrong with the claims that there was once a civilization who originates on Mars

[REDACTED] stories)! I will send you my Mars paper too!

However I do not claim that the Cydonian features are a trick of light and shadow, since I know all the other studies of these unusual surface features. If they are indeed artificial than they were build by [REDACTED] or a pre-human civilization! [REDACTED] and [REDACTED] statements are wrong, I am sure and you will see it if you read my paper! I have statements from [REDACTED] and General Stubblebine in my files where they made the same claims long before [REDACTED] (who wpu involved with [REDACTED]) published his book (it could be dissinformation too, since it could scientifically proven that their claims are wrong!

I will send you the copies this week via airmail.

best regrads
[REDACTED]

P.S. Thank you for the interest in the implant monitoring localisation topic.
