*They want to see me
within two weeks in Paris
for very serious moves -
They say : no more wasted
time - We can't afford it...*

Pierre W. MORIN (I was told by Alain BOUDIER) gave President SARKOZY
a very wise suggestion : when invited by President BUSH last December
2007; "do not speak in public anything but French for fear of any mis-
understanding". So, President SARKOZY followed the advice and talked
in French at the meeting in the Chamber of U.S. Representatives, etc.
A translator did the job of instant translation and Pierre MORIN's
advice was carefully obeyed. The idea was that if a mistake was made
it would fall on the translator and not on the French President.

I, Philippe, spoke with Nicolas SARKOZY who was the mayor of NEUILLY
the "chic" suburb of PARIS and he told me that his English was better
than mine. He was right. THAT WAS IN 1994 -

Dear Ted,

Here, enclosed, are the two pages by Didier de PLAIGE dated Saturday 23 Feb. 2008. *De PLAIGE is a serious journalist of good reputation*

This text has been sent to me only in French language and I understand that Dr. SALLA has not read it especially the part surrounded by my yellow marker.

It says : "reactions following the leak organized by Dr. SALLA concerning the United Nations meeting of Feb. 12 have been negative because of two reasons; first SALLA has made the mistake of announcing hearsay talks promoted by Eric JULIEN about a phony TSUNAMI in 2005 and the contacts of SALLA in New York City have diluted the exact information with personal comments of large magnitude which do not belong to the leak itself."

My explanation : a lot of the content in Dr. SALLA's first text does not originates from the United Nations secret meeting but almost verbatim from the writings by Dr. Michael WOLF KRUVANT. I have his taped interviews to prove this.

The text below indicates some names which are marked in yellow. This scientist you mentioned to me is indeed a real scientist : Gilles LORANT aged between 41 and 45 today. He used to be employed by the C.E.A. (Center for nuclear research) in Paris (at Saclay). He is now with the C.N.E.S. (National Center for astronautics research) in French the initials stand for Centre National des Etudes Spatiales.

Briefly, if Dr. SALLA had read an English translation of the first page (he does not read French) he would not have faxed this text to me. He would not like what Didier de PLAIGE wrote about him !

Rear Admiral Pierre William MORIN knows Gilles LORANT who he met several times and mentioned to me that LORANT would very likely have been a distinguished representative of the French Government at the U.N. meeting. With all my very best regards to the team,

Your friend, Philippe Aubin de La Messuzière

Rear-Admiral Morin is often called "Le Général".
