DISCLOSURE NEWS PROGRAMMING

[REDACTED]

[REDACTED]

July 18, 2000

Dear [REDACTED]

Thank you for speaking with me today. Enclosed are two documents that I co-authored in conjunction with [REDACTED] that lay out the scope and breadth of the disclosure project. This effort has been nearly a decade in the making. Your testimony and evidence will be crucial.

The project is drawing together hundreds of military and corporate witnesses to Top Secret UFO-related operations for the purpose of informing the public and challenging the secrecy.

This news gathering, research and production team was created to disseminate a series of sustained high-credibility multi-media presentations. In the works are a multi-part television news report to be released in conjunction with a variety of educational publications.

The TV programs will not be sensationalistic "infotainment". They shall be presented as hard news in the tradition of 60 Minutes and Frontline. The broadcasts are but one element in a coordinated strategy designed to overcome the entrenched ridicule and trivializing that often attends the subject matter. If those who control this country's "free" press blockade the timely broadcast of *Disclosure* over network television, we shall be simultaneously releasing multiple versions of this work in many complimentary formats, including videotapes, DVDs, CD-ROMs, audio cassettes, books, Internet web sites, national press conferences and eventually, symposia and internationally linked teleconferences.

We are aware that the sensitive nature of the subject matter and the concerns of many witnesses as to personal and family safety often mitigate against coming forward. On the other hand, there is safety in numbers, and we intend to bring forth the testimony of literally dozens of witnesses in unison. Under such a respectful and high profile spotlight, chances of reprisals should be at a minimum. Let me emphasize at this point that each witness shall

have final say over whether or not his or her testimony is made public or remain secure in our video archives for posterity. These guarantees shall be enforced by legally binding non disclosure and specified use rights agreements. Respect for confidentiality and safety is our primary concern.

We will be contacting you within a few weeks to secure a time and location to conduct a formal Q&A interview. Prior to filming, Dr. Greer and I shall draft tentative questions for your consideration. Feel free to provide any and all feedback concerning the topics and content.

Thank you for your fortitude and unswerving commitment.

Sincerely,

A large black rectangular redaction box covering the signature of the sender.
