Hi Steve and Emily,

This is pretty interesting. I've put his file attachments on a web page where you can download the MP3 file with his recorded testimony and the jpg file with his drawing of the disk he saw in 1979. He lives near Dan.

the URL is: <http://www.cseti.org/witnesses/FrankArbour/>

Subject: Witness Testimony Attached

Hello [REDACTED]

I recorded [REDACTED] testimony on an MP3 file attached along with a supplemental scan of a sketch he drew of the disk object he witnessed while working with Lockheed. Please pass onto Steve. [REDACTED] was a little nervous to do this due to the intense intimidation they put him through not to discuss it with anyone.

Hope another witness helps and possibly collaborates with any other Lockheed employees
