 Subject: Witness report: [REDACTED]

2. Obtain brief educational and employment history relevant to the testimony (ie, government, military, intel, corporate)

With the air force for 22 years from 1946-1968. Was a specialist in radar research at Elgin Air Force Base in Florida, with a Top-Secret, ultra-2, clearance. Rank: Chief, E-9. Later worked for Air Force Intelligence at NRO building at Langley.

3. Record the details in summary form of the witness' testimony, providing salient information on date, location, position and involvement at the time of the UFO/ET event or project

December 1951, was a witness along with thousands of others to 3 UFOs, which hovered in formation over Elgin Air Force Base from about 10 am to 11:30am. They were at about 3,000 feet and were picked up on radar. He called headquarters and said he had "Cosmos" (code word for UFOs) on radar. He took photographs and handed them around. Headquarters sent a courier to pick up the photos and other documentation. So many saw it that it was in the papers the next day.

Spent the rest of his years using his position to search for more information on UFOs, which he found extensively especially when in Air Force Intelligence.

In 1967 or '68, claims he saw a round ship, suspended in the air in a hangar at Wright Patterson AFB. His Top-Secret badge got him in, but he was quickly escorted out by MPs. Then he says he was shown medical records of alien beings with photographs of bodies which came from a recovered crash. He can give descriptions and details. Some were 102 greys. He says we had recovered over 30 beings.

4. Ascertain the witness' degree of cooperation : Is he / she willing to be interviewed under full identity? Under a disguise (we want to discourage this except in rare cases) ?

Willing to be interviewed on camera.

5. Ask if he/she has corroborating witnesses to the event or project or corroborating documents and other materials

Has photos of the 3 UFOs at Elgin AFB. Has not remained in contact with any others who witnessed subsequent events with him. There is no way to document his viewing of the medical records or the craft.

6. Always ask if the witness has other evidence, networks, or contacts to other witnesses which could be useful to the project (they may not offer this and so this should always be asked).

Nothing useful.

7. Write your own assessment of the value of the witness' testimony and credibility, and How the witness comes across (articulate, etc) .

He sounds old; is 73 years old. Would need to debrief him in greater detail to further establish credibility. There is a lot more detail he could offer beyond this preliminary interview. I get the feeling that he could come up with some more extraordinary material and maybe some of it could be documented. He knows more than what he has said, and is concerned about getting his secrecy oath lifted. He's sending a book of top secret stuff he compiled and 20 hours of video tape he collected over the years.

8. Let the witness know that we will be contacting him/her later to set up a date to conduct a full interview.

Done.
