> Hello. I am contacting you anonymously to inform you of an event
> which occurred at the White House during President Bill Clinton's 1st term
> in office. I assure you that what I have to say is not a hoax. It is
> absolutely the truth. The American people have the right to be told, and
> I feel it is my duty to inform them of what has occurred. I do not want
> to disclose my identity at this time for reasons having to do with the
> extraordinary nature of the event, and for other reasons which I do not
> wish to explain at this time. This event is being investigated by highly
> competent individuals. To reveal crucial information and details now
> would be premature, and would jeopardize the integrity of the
> investigation. The investigation is ongoing. Several witnesses need to
> complete the interviewing process before any detailed information can be
> presented for public eyes. I write to you at this time merely to inform
> you of the occurrence of the event, for I feel it is everyone's right to
> know.

> I do not wish to imply that I am a publicly known
> individual. However, if I told you how it is that I know what I know you
> would have a clue to my identity. Though I am choosing to remain
> anonymous for the time being, please do not interpret this decision to
> mean that I lack courage, or that I am deliberately trying to be
> mysterious. Anonymity is a traditionally accepted aspect of reporting
> the types of experiences which would fall into the "X Files"
> category. Further, it could be stated that revealing your identity to
> anyone besides the principal investigators holds no substantial value
> toward proving that the experience is real. All that I can tell you at
> this time is that I have inside knowledge of the event.

> For someone to state what I am going to state and to not absolutely
> possess certain knowledge that it is the truth would demonstrate
> extremely poor personal character, and lack of respect for the intellect
> and the dignity of others. I am a person of integrity and values. It
> would be the furthest from my character to ever attempt to "put one
> over", or to play a joke on people to deliberately mislead them. When
> the time comes for me to finally reveal my identity you will know my
> integrity to be genuine.

> I do not know if this event will be officially acknowledged in a
> public forum. It is my hope that at some point in the future it will
> be. In speaking of this event now, perhaps witnesses will come forward
> with valuable corroborative information. This extraordinarily important
> event may never be absolutely proven— it may simply be added to the list
> of mysteries (Area 51, Roswell, etc.). How does one prove personal
> experience? Even in the case where witnesses exist, you are accused of
> falsity, through collusion or conspiracy. Despite this, at some point in
> the not-too-distant future I intend to disclose my identity and all that

> I know about this event to establish that this historic event is based in
> fact, and that it did occur. The facts which I have to present will
> establish the reality of the event. However, at this time it must be
> understood that an event of this nature and magnitude is classified a
> matter of national security. Yet I feel it is incumbent upon me to
> inform the American people. Again, it is my hope that in speaking of
> this event I may encourage others, particularly witnesses who may have
> observed aspects of the event from a vantage point located OUTSIDE of the
> White House, to come forward. Others within the White House are aware of
> aspects of this event as well.

> I have always been open to the possibility of the existence of
> intelligent life elsewhere in the universe. It is now a widely held and
> scientifically supportable contention that indeed it is far more likely
> than not that intelligent beings do exist elsewhere in the universe. We
> are living in a time of great change. It is not often that these changes
> are so great as to challenge the very paradigm in which we live our day
> to day lives-- the window through which we view the world we live
> in. The true story I am going to relate to you holds the potential to
> shake to the very core the belief structure of every man, woman, and
> child in the United States, and the world.

> Though it is not a popular opinion to express publicly, there are
> those who for many years have believed we are not alone in the
> universe. There are also those who, through their own personal
> experiences, possess certain knowledge that we are not alone. I speak
> from personal experience when I say the question as to whether we are
> alone has been answered. Citizens of the United States, ladies and
> gentlemen of the world-- we are not alone. I hold personal first-hand
> knowledge of this. Sometime during President Bill Clinton's 1st term in
> office (I will not at this time specify the exact year, month, day, or
> hour-- for purposes of later potential independant witness corroboration
> of the event), contact took place within the White House between an alien
> race of beings (beings not of this earth) and the President of the United
> States. Also present at the time of contact were Hillary Clinton, and
> Chelsea Clinton. Prolonged and significant communication took place
> between the President and the aliens. Hillary and Chelsea and others
> present at the White House at the time of the event were also involved in
> the communications. I was present when these communications occurred. In
> addition, some security personnel in and around the White House are aware
> of certain aspects of the event. I am certain that aspects of the event
> were captured on security cameras as well.

> There were in fact 2 separate abductions which I am aware of that
> occurred, extending over a 2-day period and involving multiple people in
> various services of the US government. At present, besides the principal
> people involved, there are no less than 3 witnesses that I personally am
> aware of to the abduction of the President at the White House-- at least
> 1 of which, and potentially a second, may in fact become available for
> possible confirmation of the facts pertaining to the event.

> The contact which took place was highly covert, and was also
> involuntary in nature. "The Big Event", as I have come to prefer to call
> it, can only be described in terms of what should now be a familiar
> phrase to almost everyone-- an abduction by aliens. The penetration of
> White House security was so poetic and seamless that most people on the
> premisses of the White House were not even aware that the event took
> place. Those of you reading this who have shared in the experience of
> extraterrestrial contact know precisely the reality behind what I am
> describing. Very few people indeed, are aware of the event or of the
> total extent of the event-- or of the meaning of whatever aspect of the

> event they witnessed.

> There are essentially 7 points which I strongly feel need addressing

> at this time. I feel these are 7 reasonable and also particularly

> important extrapolations which can be drawn from "The Big Event". These

> 7 are as follows:

>

>1.) We are not alone in the universe. Advanced intelligent lifeforms do

> exist.

>2.) Based on scientific cosmological calculations, it is entirely

> possible that these advanced intelligent lifeforms are up to 1 billion

> years or more ahead of us technologically.

>3.) These intelligent lifeforms have been visiting earth for a very long

> time. The evidence for this is enormous and extensive. There is a mass

> of evidence available to support extraterrestrial visitation to earth—

> ample to move heaven and earth. Anyone who has objectively studied this

> mountain of evidence on hand for the UFO phenomenon, and also for the alien

> abduction phenomenon, knows precisely of the reality of what I am

> describing.

>4.) The contact which has been taking place for many years now,

> represents the technological domination of one intelligent species over

> another. The United States government is not in control of the

> situation. We have been, in the truest sense of the word, "invaded".

>5.) The unstoppable and awesome penetration of White House security is a

> powerful message to people everywhere— if it can happen to the most

> powerful person in the world in one of the most secure locations in the

> world, these beings can get to anyone, anywhere, at any time. No human

> being on earth is beyond their reach.

>6.) The American people have the right to know.

>7.) It is my fervent hope that in speaking of this event, I may encourage

> others, witnesses who may have observed aspects of the event from vantage

> points both within and outside of the White House, to come forward. I

> encourage anyone holding information related to these events to make

> immediate and full disclosure to me of his or her knowledge, bringing

> forward all possible corroborating information and exhibits in your possession.

>

> In closing, I would like to say that the world in which I reside

> shall never be the same. These dramatic and historic events have forever

> transformed me. I wish that everyone on earth could have seen what I

> saw, and could know what I know. I know that we are not alone. On the

> one hand, this is an awesome and powerful realization to make. On the

> other side of the issue, unfortunately, based on all that we now know

> about alien contact, one more line can be added to the old saying, "We

> are not alone"; "We are not alone— but you are going to wish we were."

> I dearly wish this were not the case. I wish none of what I experienced,

> or what the President experienced had ever happened— but it did

> happen. We must overcome our profound denial that such contacts are

> taking place, and own up to the facts as they are presenting themselves

> to us. The sooner one faces the truth, the better.

> I know this story I have relayed to you is difficult to believe and

> not easy to accept at face value. I too was in denial for quite some

> time. It has taken me several years to come to the point where I can

> begin to share my thoughts about "The Big Event". I can only say that I

> sympathize with these overwhelming feelings which are related to such an

> extraordinary experience. In the end everyone must judge for themselves.

> The future holds exciting new possibilities as we stand now on the

> cusp of a new era in Human history. Humankind need not fear the

> future. Nor should we allow ourselves to feel powerless over external

✓ Thank you.

The Walrus

 Hello. I am contacting you anonymously to inform you of an eve
